

# Obstetrics and Gynecology

---

This learning pathway contains training and tools for OB/GYN professionals to provide expert symptom management for their patients with serious illness.

## **Course 4: Assessing Risk for Opioid Substance Use Disorder**

Integrating routine risk assessment for substance use disorder when considering or using opioid therapy.

## **Course 6: Prescribing An Opioid**

Safe and appropriate opioid prescribing for the opioid-naive patient with serious illness.

## **Prescribing Opioids: A Pocket Reference**

Opioid pocket reference for providers including safe starting doses, equianalgesic chart, and standard dosing strengths.

## **Course 8: Monitoring for Opioid Efficacy, Side Effects, and Substance Use Disorder**

Ongoing evaluation of opioid benefits, risks, and side effects for the patient with serious illness.

## **Course 10: Prescribing Practice and Opioid Conversions**

Prescribing practice for long half-life opioids, converting from one opioid to another, and accounting for incomplete cross-tolerance.

## **Nausea and Vomiting in Patients with Serious Illness**

Nausea and vomiting are common symptoms of serious illness, and can cause dangerous complications. Take this online course to learn practical skills to identify, manage, and reduce these symptoms.

## **Anxiety in Patients with Serious Illness**

Take this online course to learn evidence-based strategies to identify and treat anxiety in patients with a serious illness.

## **Depression in Patients with Serious Illness**

This online course teaches how to accurately identify and treat depression in patients living with a serious illness.

## Reducing Risks for Older Adults

This course provides context and best practices for identifying older adults at risk for poor outcomes, including falls, delirium, and caregiving challenges.
