

Pain Management Designation

This learning pathway provides comprehensive continuing education in pain management and safe opioid prescribing for patients living with a serious illness. Clinicians can use CAPC Designation to demonstrate expertise in managing pain for this patient population.

Course 1: Comprehensive Pain Assessment

Conducting a comprehensive pain assessment to guide safe and effective treatment.

Course 2: Matching the Drug Class to the Pain

Selecting a safe and appropriate analgesic for patients with serious illness based on the pain assessment.

Course 3: Patient Factors that Influence Prescribing Decisions

Patient and family factors that influence prescribing decisions for patients with serious illness.

Course 4: Assessing Risk for Opioid Substance Use Disorder

Integrating routine risk assessment for substance use disorder when considering or using opioid therapy.

Course 5: Opioid Trials: Determining Design, Efficacy, and Safety

Designing a safe and effective opioid trial for the patient with serious illness.

Course 6: Prescribing An Opioid

Safe and appropriate opioid prescribing for the opioid-naive patient with serious illness.

Course 7: Prescribing Short-Acting Opioids: Four Case Studies

Four indications for using short-acting opioids.

Course 8: Monitoring for Opioid Efficacy, Side Effects, and Substance Use Disorder

Ongoing evaluation of opioid benefits, risks, and side effects for the patient with serious illness.

Course 9: Converting from Short-Acting to Long-Acting Opioids

Guidance on safe conversion to long-acting opioids for patients with serious illness.

Course 10: Prescribing Practice and Opioid Conversions

Prescribing practice for long half-life opioids, converting from one opioid to another, and accounting for incomplete cross-tolerance.

Course 11: Advanced Conversions and Opioid Side Effects

Changing the route of opioid delivery, rotating opioids, advanced opioid conversions, and tapering opioids.

Course 12: Special Populations And Patient-Controlled Analgesia

Safe opioid prescribing in older adults, cognitively impaired patients, children, and the imminently dying, including patient-controlled analgesia.

Course 13: Managing Pain in Patients At Risk for Substance Use Disorder

Pain management for patients with serious illness and high risk for substance use disorder, including risk assessment, monitoring, and when to refer for safe pain management.

Course 14: Pain Management: Putting it All Together

Safe opioid prescribing for patients with serious illness, using the Federation of State Medical Boards (FSMB) Guidelines for the Chronic Use of Opioid Analgesics.
